DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Derek Meeker on May 30, 2007.

3. The application has been amended as follows:

In the Claims:

Amend Claim 38 as follows (the entire text of Claim 38 appears below):

38. A method for providing insurance against data loss, comprising:

- establishing a remote data volume including all data of a local data volume at a point in time;
- updating the remote data volume over a communications link with data changes to the local data volume;
- determining an exposure period, the exposure period based on a time period between a time a data change occurs on the local data volume and a time the data change occurs on the remote data volume, and the exposure period indicating a time over which the data change is at risk;
- calculating an insurance premium using the exposure period; and

issuing an insurance policy using the insurance premium, the insurance policy covering claims for loss of data from the local data volume.

Notice of Allowance

4. Claims 38-46 (Renumbered claims 1-9) are allowed.
5. The following is an examiner's statement of reasons for allowance:

The Crawford reference teaches the step of establishing a remote data volume including all data of a local data volume at a point in time and updating the remote data volume over a communications link with data changes to the local data volume.

The Crawford reference and the other prior art of record, however, do not teach the following features:

determining an exposure period, the exposure period based on a time period between a time a data change occurs on the local data volume and a time the data change occurs on the remote volume data, and the exposure period indicating a time over which the data change is at risk;

calculating an insurance premium using the exposure period; and

issuing an insurance policy using the insurance premium, the insurance policy covering claims for loss of data from the local data volume.

"Insure your computer system" by Terry Corbitt teaches the concept of creating an insurance policy to protect against data loss due to viruses and also teaches the concept of making backup copies of data but does not teach the step of determining an exposure period, the exposure period based on a time period between a time a data change occurs on the local data

volume and a time the data change occurs on the remote volume data, and the exposure period indicating a time over which the data change is at risk.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquire concerning this communication or earlier communications from the examiner should be directed to Vivek Koppikar, whose telephone number is (571) 272-5109. The examiner can normally be reached from Monday to Friday between 8 AM and 4:30 PM.
